1 OVERVIEW

1.1 DEVELOPER APPROVAL

All homes built at Octave at Junction Village must be approved by the Design Assessment Panel (DAP) prior to lodging for any Building Permit or commencing any construction of works. The DAP is appointed by the developers of Octave at Junction Village to oversee and implement the objectives of the Design Guidelines. The Design Guidelines may be changed from time to time at the DAP's discretion.

Applications for the Developer's Approval will be assessed against the current version of the Design Guidelines. Interpretation and application of these Design Guidelines is at the sole discretion of the DAP. The DAP's decisions are final. No claims shall be made to the Developer, the DAP or their representatives with respect to the decisions made.

The DAP reserves the right to vary or waive the requirements of the Design Guidelines if it believes that a proposal (or an element of a proposal) that is not strictly in accordance with the wording of the Design Guidelines nonetheless makes a positive contribution to the overall objectives of the built form and/or streetscape at Octave at Junction Village.

Note: A proposal that does not comply with the Design Guidelines may require Council planning permission, in the event that the proposed variation is also contrary to the Botanic Ridge Precinct Structure Plan Residential Design Controls.

Allowance has been made for two submissions for each Design Approval application. Each additional submission may incur an administration fee, at the sole discretion of the DAP. New submissions for a lot that has already had an application approved may also incur an administration fee.

1.2 SUBMISSION REQUIREMENTS

All submissions for Developer Approval must be in PDF format and include the following information:

Site plan at minimum 1:200, with dimensions and showing:
- Lot boundaries and any easement(s) on title
- Proposed building footprint and all proposed setbacks
- Contours (at 0.5m interval or less) or spot levels
- On-site car parking and driveways
- Other external structures (including pools and spas)
All ancillary items, including, but not limited to;
- water tanks and storage units
- solar panels
- television antennae
- air-conditioning units
- evaporative cooling units
- heating units
- bin storage area
- sheds and any out-buildings

All floor plans, roof plans and elevations at 1:100, with dimensions and showing:
- Internal layout, and any pergolas, decks, terraces, balconies, verandas, windows, doors and other openings
- Proposed floor levels

A Colour Board in PDF format (see Appendix A) with all external finishes, materials and colours clearly labelled to show which building element they represent, including:
- roofing
- rain water fixtures (gutters, downpipes, fascias etc.)
- external walls
- window frames
- garage door
- driveway

Landscape plan at 1:100, with dimensions and showing:
- indicative extent of all hardscape and softscape
- planting schedule that lists all proposed species referenced on landscape plan

For lots with greater than 1.5m land fall, please include the following, at 1:100:
- at least one sectional drawing that explains the extent
of proposed cut and fill locations and heights of any proposed retaining walls.

1.3 SUBMISSIONS
When you are ready to make your submission for Developer Approval, you can lodge it on the Design Approval Portal at www.ngdd.com.au. Users must first register to use the portal. Once this has been done, log in and simply enter the relevant details when prompted. Generally, we will review and respond to you within 10 working days of your submission, but this time may vary depending on the nature and completeness of your submission. Please note that incomplete submissions are the single greatest cause of delays in obtaining a Developer Approval. Check that your submission includes all the required information before lodging it. Complete and thorough submissions take the least time to process, review and approve.

1.4 RE-SUBMISSIONS
Should a re-submission be required, please ensure that any alterations or changes are suitably highlighted on the plans or in any accompanying communication. This will help to speed up the processing and assessment.

1.5 TIMING
a. Construction of your home must start within 6 months of the settlement date. Completion of your home, including garage, driveway, fencing and retaining walls should occur within 18 months of settlement.
b. All front gardens must be landscaped in accordance with these Guidelines (including all turf, soft landscape, driveways and pathways) within 6 months of issue of the Certificate of Occupancy.
c. Fencing must be constructed within 30 days of the issue of the Certificate of Occupancy.

1.6 OTHER APPROVALS
The requirements detailed in this document are in addition to, and not in lieu of, any other legal or statutory requirements. It is the responsibility of the owner to ensure any other approvals, authorisation permits or other requirements are obtained and satisfied.

1.7 DEFINITIONS
For the purposes of these guidelines:
• Public Realm is any land that is within the ownership of a public body, including Council and servicing authorities
• The Primary Frontage is the boundary that abuts the Public Realm
• The Front Façade is the elevation that addresses the primary frontage
• A Corner Lot is any lot that has more than one boundary that abuts the Public Realm
• On corner lots, the primary frontage is the shorter one abutting the Public Realm, unless noted otherwise on the Plan of Subdivision
• Secondary Frontage means any boundary that abuts the Public Realm, other than the primary frontage
• For irregular lots, the Lot Width is the width of the lot at the front building line
• Natural Ground Level means the ground level after engineering works associated with the subdivision
• Building Envelope Plan means the Building Envelope Schedule included in the Land Sales Contract annexures
• Front Loaded refers to a lot where the garage is accessed from the primary frontage
• Rear loaded refers to a lot where the garage is accessed from the rear of the lot, usually from a lane or secondary street
• Interface A Zone lots are specific lots that are identified on the Building Envelope and Residential Design Control Zones Plan
• Interface B Zone lots are specific lots that are identified on the Building Envelope and Residential Design Control Zones Plan
• Neighbourhood Zone lots are specific lots that are identified on the Building Envelope and Residential Design Control Zones Plan
• Village Zone lots are specific lots that are identified on the Building Envelope and Residential Design Control Zones Plan

1.8 SMALL LOT HOUSING CODE (SLHC)
Lots that provide a single dwelling and have an area of less than 300m² are also subject to the requirements of the Small Lot Housing Code (SLHC). In the event of any clash between the SLHC requirements and these Design Guidelines, the SLHC shall take preference. The DAP will not assess proposals against the requirements of the SLHC. Should a development not meet the provisions of the SLHC it will require planning approval from Council. Prior to lodging that application with Council, approval must be obtained from the DAP.
ENVIRONMENTAL SUSTAINABILITY
LIVEABILITY CONSIDERATIONS
Applicants are encouraged to submit designs that are environmentally responsible.

The orientation of your lot will determine the best siting of the house on the lot. A building’s orientation plays a large part in achieving the optimum solar access for your home during winter. Lots on the north side of a street will have sunny backyards – good for private outdoor living. Lots on the south side of a street will have sunny front yards – good for show piece gardens. Lots facing east-west will have sunny side yards. These houses should be sited to leave the largest possible outdoor living space along the northern boundary.

Dwellings can become more liveable by taking into account the orientation of rooms and windows, shading of windows and walls, ceiling heights, sustainable building materials, cross flow ventilation, covered open spaces, insulation and water efficient fixtures. Eave design can act as excellent shading devices during warmer months. Implementing these features can also result into substantial financial savings for the home owner.

Double storey homes must respect the privacy of neighbouring dwellings, including potential overshadowing issues that may arise as a result of siting choices. It is the responsibility of applicants with double storey proposals to ensure their design has demonstrated these factors and to receive approval from the relevant authority and/or Building Surveyor prior to construction.

SOLAR HEATING PANELS
Solar heating panels must be located on roof planes preferably not visible from the Public Realm. The panels should follow the roof pitch. Where visible from public, solar panels will be assessed on their merits with regard to scale, form and colour.

RAINWATER TANKS
Rainwater storage is encouraged. The rainwater tank and all accessories must not be located in front of the dwelling or be visible from the street and public spaces. The rainwater tank and all accessories must be coloured to match the dwelling. To help calculate the size of water storage that you may require please contact the Department of Sustainability and Environment for appropriate storage requirements in relation to the collection area provided.

RECYCLED WATER
Recycled water will be in use for non-drinking purposes such as toilet flushing and garden usage. All residents are required to connect their dwellings to this service to reduce the consumption of potable water. For more information, please visit the South East Water webpage, or visit the link below to find out about recycled water in the home www.southeastwater.com.au/LearnAboutWater/TypesWater/Pages/RecycledWater.aspx

ENERGY RATINGS
It is the applicants’ responsibility when building a home to comply with Victoria’s energy rating requirements. Dwelling designs should be assessed by a licensed energy rating company, and they in turn will make recommendations regarding insulation and other resource saving measures. Dwellings must achieve the minimum standard as currently legislated.
3 LOT PLANNING

3.1 LOT LAYOUT

- Only one dwelling is permitted per lot, unless otherwise provided on the relevant Plan of Subdivision.
- The dwelling must have at least one habitable room window that addresses the primary street frontage. A habitable room is a living room or a bedroom. On Corner Lots, the dwelling must have at least one habitable room window that addresses the secondary street frontage.
- The habitable room window should have appropriate head and sill heights to provide passive surveillance to the Public Realm.
- On Corner Lots, the primary street frontage is the shorter frontage adjacent to the street, unless otherwise noted on the Plan of Subdivision or Building Envelopes.
- Dwellings must comply with the following minimum dwelling size, excluding garage and all unenclosed areas, unless otherwise approved by the DAP:

<table>
<thead>
<tr>
<th>LOT SIZE</th>
<th>DWELLING SIZE (MIN.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than (or equal to) 300m²</td>
<td>100m²</td>
</tr>
<tr>
<td>More than (or equal to) 300m² &amp; less than 450m²</td>
<td>120m²</td>
</tr>
<tr>
<td>More than 450m²</td>
<td>150m²</td>
</tr>
</tbody>
</table>
3.2 BUILDING SETBACKS

a. All dwellings must be contained within the Building Envelope Plan applied to the lot. The Plan included under Appendix B delineates the various residential design control zones for the project and the table below illustrates the dwelling setback requirements for the lots comprised within each zone:

<table>
<thead>
<tr>
<th>INTERFACE A ZONE</th>
<th>INTERFACE B ZONE</th>
<th>NEIGHBOURHOOD ZONE</th>
<th>VILLAGE ZONE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front Setback (FS)</td>
<td>13m minimum</td>
<td>6m minimum</td>
<td>Area &lt;= 550m²</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>4m minimum</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>5m minimum</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Area &gt; 550m² &amp; &lt;= 720m²</td>
</tr>
<tr>
<td>Rear Setback</td>
<td>10m minimum</td>
<td>8m minimum</td>
<td>2m minimum</td>
</tr>
<tr>
<td>Side Setback - Inline Lots</td>
<td>1m minimum from at least 1 boundary</td>
<td>1m minimum from at least 1 boundary</td>
<td>1m minimum from at least 1 boundary</td>
</tr>
<tr>
<td>Side Setback - Corner Lots</td>
<td>2m minimum</td>
<td>2m minimum</td>
<td>2m minimum</td>
</tr>
<tr>
<td>Garage Front Boundary Setback (GS)</td>
<td></td>
<td></td>
<td>5.5m minimum</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

FRONT ENCROACHMENTS

b. The following may encroach into the front setback:

- balconies, verandas, open porches, covered walkways and porticos that have a maximum height less than 3.6m above the ground level, by no more than 1.5m
- eaves, fascia and gutters by no more than 600mm.

d. Eaves, fascia and gutters may encroach into the side and rear setback distances by not more than 600mm.

LANDSCAPING CONSIDERATIONS

In addition to the minimum prescribed setbacks described above, consideration should be given to the mature size of any proposed planting, particularly in the front setback, to allow plenty of space for roots and branches to spread.

3.3 BUILT FORM VARIETY

a. Similar façades are not permitted within 3 lots of each other along both sides of the street. The determination of this issue will be at the sole discretion of the DAP.
4.1 CHARACTER AND VISUAL STYLE

Facades must be contemporary in style. This will be achieved through simple forms including low-pitched roofs and well proportioned façade elements, combined with controlled use of materials and colours as described in the following sections:

- Historical styles, such as Edwardian and Georgian etc, are not permitted
- Period detailing and ornamentation, such as quoins, fretwork, gable vents, curvilinear profile mouldings etc, are not permitted
- Ornamentation of facades is to be limited to ancillary building elements such as porches, balconies, pergolas and architectural screens to encourage articulation of the facade and interest to the streetscape

The determination of this stylistic issue is at the sole discretion of the DAP.

4.2 BUILDING HEIGHT

a. All buildings are limited to a maximum height of 8.5m above natural ground level.

b. In addition to this, lots in Interface A are limited to a maximum of 1 storey. Please refer to the building Envelope for details.

c. Double storey lots in Interface B must have the upper level set back behind the front wall of the dwelling.

4.3 MASSING AND ARTICULATION

a. Each dwelling must incorporate a prominent front entry point that is readily visible from the primary frontage and complementary to the overall dwelling design.

b. The front façade must not be continuously straight for more than 6.5m

c. Rooms fronting the Public Realm must have a minimum ground floor ceiling height of 2700mm, or 2550mm for lots 300m² or smaller.

d. Two storey dwellings must incorporate elements such as balconies and / or protrusions to articulate the front façade.

e. At least 50% of all rooms that are adjacent to a secondary boundary must have windows facing that boundary.

4.4 CORNER LOTS

a. Dwellings on Corner Lots must address the secondary frontage by incorporating the same or similar design features to those used on the primary frontage. Acceptable features may include:
- windows with matching head heights
- highlight materials and finishes that wrap around from the primary facade
- pergolas, porticos, porches, verandas and balconies
- roof elements, such as feature gables
- other treatments, to the satisfaction of the DAP

b. Materials used on the front façade must extend to the secondary frontage for a minimum of 3m

c. Corner features must be forward of the Return Fence and / or readily visible from the Public Realm. Blank walls forward of the Return Fence will not be approved

d. Any secondary façade that exceeds 10m in length must incorporate articulation in one of the following ways:
- a step in the wall that is at least 0.3m deep for a length of at least 1 metre, such that any part of the wall is not continuously straight for more than 10m; or
- contrasting material for at least 2m to limit any continuous material length to 10m; or
- contrasting wall colours for at least 2m to limit any continuous colour length to 10m.

e. At least 50% of all rooms that are adjacent to a secondary boundary must have windows facing that boundary.
### 4.5 Roof Design

Low pitch roof forms and styles are preferred and strongly encouraged.

- **Skillion roofs must have:**
  - a roof pitch of between 10° and 30°

- **Hip or gable end roofs must have:**
  - a roof pitch of no more than 25°. Low roof pitches (20° or less) are preferred.

- **Skillion, hip or gable end roofs must have:**
  - a minimum eaves width of 450mm to any façade that faces the Public Realm. Eaves of at least 600mm are preferred and strongly encouraged
  - the front eaves returning along the side wall for at least 1.5m on single storey dwellings
  - a minimum eaves width of 450mm to the entire upper level on two storey dwellings. Eaves of at least 600mm are preferred and strongly encouraged

- **Walls constructed on side boundaries (zero lot line) will be exempt from the eaves requirements but not from the parapet requirements. Please note that the height of the wall on a boundary will not exempt the wall from the parapet requirements.**

### 4.6 Materials and Finishes

- **a.** Colour schemes should adopt a palette of muted neutral tones at the lighter end of the colour spectrum.

- **b.** The front façade must be finished with a mixture of at least 3 external materials / finishes and / or colour finishes.

- **c.** Face brick or masonry blocks must make up no more than 70% of the front façade (not including the garage door or other openings such as windows and doors).

- **d.** Other front façade materials may include:
  - render
  - timber cladding
  - weatherboard (painted)
  - lightweight cladding
  - stone
  - other materials approved by the DAP

- **e.** Materials used on the front façade must extend to the side elevation for a minimum of 1.5m except for a Corner Lot where additional requirements apply. Refer to Section 4.4 Corner Lots.

- **f.** Roof cladding must compliment the style of your home:
  - metal roof sheeting must be of a corrugated profile if visible from the Public Realm
  - tiles must be of a flat / shingle type profile

- **g.** All roof materials and finishes must be matte finish, non-reflective and in one of the following colour tones:
  - muted grey
  - blue / grey
  - charcoal
  - green

- **h.** Galvanized, zincalume or unfinished roof materials and rainwater fixtures are not permitted.

- **i.** No dwelling is to be built with any exposed stumps.

- **j.** Aluminium sliding windows and doors are unlikely to be approved if visible from the Public Realm, unless they are manufactured from commercial or semi commercial sections.

- **k.** The front facade (and secondary frontages) must not include lightweight infill panels above doors, windows or garage doors. The finish / colour above the opening must match the finish / colour on either side of the opening.

- **l.** Roll down security shutters must not be visible from the Public Realm.

- **m.** Glazing that is visible from the Public Realm must not contain leadlight, stained glass, reflective glass or patterned film.
4.7 CAR ACCOMMODATION

a. All lots must incorporate a fully enclosed garage. Carports and open sided garages are not allowed.

b. Garages accessed from the primary frontage of a lot must be integrated into the overall form of the dwelling and must be stepped back a minimum of 1m from the front wall of the dwelling. This distance is measured from the front building line, not from verandas or porches etc.

c. Garages that are not accessed from the primary frontage may be detached, at the discretion of the DAP. Detached garages must have:
   • materials, colours and finishes that match or complement the dwelling; and
   • a roof form consistent with the dwelling.

d. Any detached garage that is located on a lot in Interface A or Interface B must also not have:
   • a height exceeding 3.6m above natural ground level; or
   • an area exceeding 50m².

e. Rear Loaded lots must incorporate a garage at the rear of the lot. Crossovers are not permitted on the front boundary of these lots and garages are not permitted to be located at the front of these lots.

f. Front loaded lots with a lot width of 12.5m or more must provide a double garage.

g. The total width of the garage door openings on front loaded lots must not exceed 40% of the effective lot width.

h. The maximum width of any single garage opening is 7m.

i. Any garage door visible from the Public Realm must be either a sectional overhead or tilt panel type only.

TRIPLE GARAGES

In addition to the other requirements in this section, triple garages will only be allowed where:

j. The dwelling is a lot with an effective lot width of at least 18m;

k. garages comprise either one double and one single garage element or three single garage elements with a column / pillar dividing at least two of the elements; and

l. the wall that contains the third door must be stepped back at least 500mm from the other front wall of the garage.
OTHER EXTERNAL ELEMENTS
5.1 DRIVEWAYS

a. Each lot must have a maximum of one crossover per frontage.
b. Driveways must be constructed from:
   • Exposed aggregate concrete
   • Coloured-through concrete
   • Slate
   • Natural Stone
   • Asphalt
   • Brick
c. Driveway colours should be muted.
d. Plain (uncoloured) and painted concrete driveways are not permitted.
e. The driveway must be set back a minimum of 0.5m from the side boundary to provide a strip for landscaping.
f. Driveways must not be wider than the garage door where they meet the garage and must taper to the width of the crossover at the boundary.
g. The driveway must be constructed prior to the occupancy of the dwelling.

5.2 LAND FORM (RETAINING WALLS)

a. The maximum height of any retaining wall is 1.0m. If a higher wall is required, more than one wall must be used in conjunction with graded slopes, battering and other landscape treatment to soften the appearance of the change in levels. Council approval may be required for retaining walls. Owners should make their own enquiry.
b. Thought should also be given to providing a landscaping strip of approximately 200mm in front of the retaining wall to soften the height.
c. Retaining walls visible from the Public Realm must be constructed from a material and finish to complement the house, to the satisfaction of the DAP. Acceptable finishes may include:
   • Stone;
   • Face or rendered masonry; or
   • Concrete sleepers with an appropriate applied finish and galvanised support columns.
d. Timber sleepers are not permitted.
e. The extent, height and finish of all proposed retaining walls must be included in any application for Design Approval.
f. Refer to Council for additional retaining wall requirements.

5.3 FENCING

a. Only timber paling fencing is permitted.

FRONT FENCING

b. Front fences are not permitted.

Front fences may be considered for integrated housing sites and lots where the primary frontage directly abuts the Public Realm, at the sole discretion of the DAP.

INTERLOT FENCING (FENCING BETWEEN LOTS)

c. Interlot fencing must be:
   • Constructed with exposed timber posts on both sides, a 150mm bottom plinth, lapped timber palings and timber capping
   • A maximum height of 1.8m above natural ground level
Terminated at a minimum of 1m behind the closest front wall of the dwelling, unless it is on the rear boundary of an adjoining lot

- Terminated by returning to meet the closest wall of the dwelling (Return Fence)

**Corner Fencing must comprise of 2 sections...the Transparent section and the Privacy section.**

d. The Transparent section of the corner fence must:
   - Start a minimum of 3m behind the closest front wall of the dwelling
   - Be at least 75% transparent for at least 50% of the length of the relevant boundary
   - Have a maximum height of no greater than 1.5m above natural ground level
   - Return at the start to meet the closest wall of the dwelling at 90 degrees to the dwelling wall (Return Fence)
   - Terminate where the Privacy section starts

e. The Privacy section of the corner fence must:
   - Run along the relevant boundary from the Transparent fence to the rear boundary
   - Incorporate exposed timber posts, timber rails that are concealed from the Public Realm, a 150mm bottom plinth, and lapped timber palings with timber capping
   - Incorporate a maximum capping height of no greater than 1.8m above natural ground level

- Incorporate a maximum post height of no greater than 2m above natural ground level

**RETURN FENCING**

f. The Return Fence must be:
   - Constructed with materials and finishes to match or complement the adjacent fence
   - The same height as the adjacent fence

**GATES**

g. Any gate in a fence must match or complement the fence in terms of materials and finishes

**WING FENCING (FENCING BETWEEN THE RETURN FENCE AND THE FRONT BOUNDARY)**

h. Wing fences are not permitted

---

**5.4 LANDSCAPING**

Landscape works are part of the design approval process. A Landscape Plan must be included with the submission for design approval and approved prior to the commencement of construction.

A well designed, constructed and maintained front garden is an important part of your new home. These Design Guidelines have been prepared to ensure that the landscaping to all private gardens enhances the streetscapes of Octave at Junction Village for all residents. For guidance, Appendix C provides a range of front yard landscape layouts shown on various lot types common throughout the project to demonstrate preferred design options.

**DESIGN**

a. Front gardens must complement the design of your home and be contemporary in style

b. Consider the orientation of your garden and the amount of shade your garden receives when planning the design and location of paved areas or paths as well as garden beds

c. All front gardens must be well planted so as to enable full coverage of garden beds when established

d. Landscape elements must be used to soften and screen any ancillary structures or service equipment that are visible from the Public Realm and cannot be located elsewhere within the lot
e. A minimum of one tree must be provided to the front garden (minimum install size 45L stock and 1.8m tall). Trees must be located to avoid interference with services, infrastructure and neighbouring properties.

f. Garden bed preparation is recommended to include a minimum of 200mm of topsoil and 75mm mulch.

g. All front gardens must be kept presentable and well maintained. This includes but is not limited to being free of weeds, litter and debris. All lawn areas must be regularly mown and kept free of weeds.

MATERIALS AND FINISHES
Consideration must be given to the types of materials selected for use within your front garden and how these visually enhance your home.

a. Colour schemes for hard surfaces should be muted neutral tones in order to complement the built form of the home and driveway materials.

b. Any paths or paved areas must be constructed from:
   • Exposed aggregate concrete
   • Coloured-through concrete
   • Slate
   • Natural stone
   • Brick
   • Granitic gravel with a defined edge (such as timber or steel edging)

c. Plain (uncoloured) and painted concrete paths or paving areas are not permitted.

d. Paved areas must be set back a minimum of 0.5m from the side boundary and a minimum of 2m from the front boundary to provide a strip for planting and soft landscaping.

e. Garden areas must be mulched with bark, not pebbles or gravel.

f. Lawn areas must not be artificial turf.

PLANT SELECTION
The provided plant lists must be considered when planning your garden design. Casey City Council also provide plant lists for species suitable to the local environment of Junction Village and the Botanic Ridge area that could be useful in planning your garden.

A visit to the Royal Botanic Gardens Cranbourne or a local nursery for advice on plant selection for your garden may be useful when preparing your Landscape Plan. The Royal Botanic Gardens Cranbourne also has display gardens that showcase how native plants can be used within contemporary residential designs.

Avoid planting common weed species in your garden.

a. Plants for inclusion in your garden must be selected from the provided plant lists. You may select a combination of native, indigenous and exotic plants from Plant List 1 and Plant List 2.

b. Any lots located within the Bushfire Management Overlay or within 150m of the Royal Botanic Gardens Cranbourne boundary must ensure that a minimum of 60% of plants are native and indigenous plants selected from Plant List 1.

c. The selection of native or indigenous plants from Plant List 1 is strongly encouraged to complement the surrounding landscape environment of Junction Village and the adjacent Royal Botanic Gardens Cranbourne.

d. Plants not included on the provided lists will be considered but are subject to approval by the DAP.

Plant List 1: Native and Indigenous Plants

## RESOURCES

Some resources that you should consult when preparing your landscape plan:
- Landscaping for Bushfire: Garden Design and Plant Selection, CFA, November 2011
- Your Sustainable Garden booklet, City of Casey
- Botanic Ridge Precinct Structure Plan (updated May 2017)
6.1 RECYCLED WATER
a. Each dwelling must incorporate plumbing that allows for connection to any future recycled water supply
b. As a minimum, you must allow for all toilets and two garden taps (front and rear) to be connected to any future recycled water system

6.2 SHEDS AND OUTBUILDINGS
a. If less than 10m² in area, sheds and outbuildings must not be readily visible from the Public Realm
b. If more than 10m² in area, sheds and outbuildings must have:
   • a roof form consistent with the dwelling
   • materials, colours, and finishes that match or complement the dwelling
   • a maximum height of 3.6m at the ridgeline, measured from natural ground level
   • a maximum height of any perimeter wall, excluding the gable infill, of 2.4m, measured from the natural ground level
c. The maximum total floor area of outbuildings on a lot must not exceed 50sqm, unless planning approval is granted by the City of Casey. For the purpose of this requirement, an outbuilding is classified as any building on the lot which is detached from the dwelling i.e. the calculation does not include the floor area of a garage attached to the dwelling.

6.3 LETTERBOX
a. Letterboxes must complement the dwelling in terms of materials, colour and style
b. Single post supported letterboxes are not permitted

6.4 SERVICE EQUIPMENT
a. Satellite dishes, antennae or external receivers must be:
   • located to the rear of the dwelling
   • not readily visible from the Public Realm
b. Heating and cooling units must be:
   • located towards the rear of the dwelling
   • if located on the roof, and satellite dishes, antennae or external receivers heating and cooling units must be:
     • positioned below the ridge line
     • positioned to the rear of the roof and
     • coloured to match the roof as far as practical
c. Photovoltaic cells, solar panels and the like may be located to maximise their efficiency as long as they integrate with the roof form

6.5 SCREENING
a. Ancillary structures and elements must be located so that they are not readily visible from the Public Realm. This includes items such as:
   • rubbish bin storage areas
   • washing lines
   • hot water systems
   • any water storage tanks
   • swimming pools
   • spa pumps
   • external plumbing other than that for rain water
b. Trucks, commercial vehicles exceeding 1.5 tonnes, recreational vehicles, trailers, caravans, boats, horse floats or other like vehicles must be located so that they are not readily visible from the Public Realm when parked or stored on the lot

6.6 SIGNAGE
a. Signs to advertise the sale of a vacant lot are not permitted unless approved by the Developer
b. One sign only may be erected to advertise the sale of a completed dwelling
c. Signs for dwelling names and home businesses are strictly not permitted.

6.7 MAINTENANCE OF LOTS
a. The Purchaser shall not allow any rubbish including site excavations and building materials to accumulate on a lot (unless the rubbish is neatly stored in a suitably sized industrial bin or skip) or allow excessive growth of grass or weeds upon the lots
b. The Purchaser shall not place any rubbish including site excavations and building materials on adjoining land, reserves or in any waterways

6.8 CROSSOVER & FOOTPATH PROTECTION
It is the responsibility of the Landowner to ensure that any required asset protection permits are obtained prior to the commencement of building works.

6.9 STREET TREE PROTECTION
It is the responsibility of the Landowner to ensure that any street trees and / or nature strips are protected during all building works.

DEVELOPER’S RESPONSIBILITY
Whilst the Developer will endeavour to ensure compliance with these Design Guidelines wherever possible, they will not be responsible or liable to any person for any loss, damage or injury arising whether directly or indirectly from any noncompliance with these Design Guidelines.
DESIGN APPROVAL CHECKLIST
The design approval portal (www.ngdd.com.au) will prompt you to enter all the information required to make an application for design approval at Octave at Junction Village.

The information required to lodge an application includes:

- Lot number and street name
- Owner’s name, address and contact details
- Builder / Designer’s name, address and contact details
- Applicant’s name, address and contact details, if the applicant is not any of the above parties

The design information listed in Section 1.3, Submission Requirements, includes:

- Site Plan
- Floor Plan(s)
- Elevations
- Landscape Plan
- Printed Colour Board with materials / colour / finishes samples (as shown in Appendix A)

Please note that incomplete or partial applications will be returned without assessment.

LOT - INTERFACE A ZONE

LOT SIZE: 18m x 45m
FRONT SETBACK: 13m

All front lot garden designs must be prepared in accordance with the Octave at Junction Village Design Guidelines and are subject to approval by the Design Assessment Panel.

The following is an indicative garden design with some suggested potential options for paving, landscape features and planting design.

- Linear service path to be paved to match optional entry path or granitic gravel surface with steel or timber edge
- Concrete driveway with linear accents such as feature paving bands, alternate gravel/planting or sawcuts to moderate the length of driveway
- Linear garden beds with layered planting
- Optional 1.5m paved linear entry path to front porch
- Hedged shrubs or screening planting along boundary fences
- Letterbox in keeping with architectural style + materials
- Maintain structured and defined edges to garden beds and lawn areas
- Low groundcovers such as Brachyscome multifida planted along the front wall of the dwelling
- Structured geometric lawn area framed by garden beds and trees with low understory planting. Remove low tree branches above understory planting
- Locate a garden seat or table setting to maximise use of the substantial front yard
- Avoid large areas of continuous garden beds by using areas of gravel / lawn to create separation and openness in the design
- Edge planting or course or fleshy-textured plants
- Small native feature trees, less than 15% of total space at maturity
- Choose plants with interesting foliage colour or flowers as a highlight within the garden

PAVING & LANDSCAPE FEATURES/MATERIALS TO COMPLEMENT ARCHITECTURE

- Calculate tree canopy size: aggregate no more than 15% of total space
- Native tree 5mx5m
- Groundcover
- Small native feature trees, less than 15% of total space at maturity
- Grass area (less than 10cm height)
- Bench seat in granitic gravel surface overlooking open lawn area
- Small native feature trees, less than 15% of total space at maturity
- Grass area (less than 10cm height)
- Linear garden beds with layered planting

DWELLING

Maintenance Plan:
- Remove fallen leaves and other debris
- Maintain grass height <5cm in Summer (reduce surface fire - horizontal separation)
- Remove lower branches from trees min. 2m from ground (reduce fuel ladders - vertical separation)
LOT - INTERFACE A ZONE

PAVING & LANDSCAPE FEATURES/MATERIALS TO COMPLEMENT ARCHITECTURE

Angular paving accents or feature saw cuts in concrete
Linear feature paving bands or saw cuts in concrete
Brick paving laid in linear bands provide a detailed feature paving treatment
Locate a garden seat or table setting to maximise use of the substantial front yard

PLANTING DESIGN

Plant species must be selected from the lists provided in the Design Guidelines.

Octave at Junction Village is located within a Bushfire Management Overlay. Accordingly, a minimum of 60% of plants for all lots are required to be native and indigenous species selected from Plant List 1.

Low groundcovers such as Brachyscome multifida planted along the front wall of the dwelling
Structured geometric lawn area framed by garden beds and trees with low understory planting. Remove low tree branches above understory planting
Edge planting or course or fleshy-textured plants

Maintain structured and defined edges to garden beds and lawn areas
Avoid large areas of continuous garden beds by using areas of gravel / lawn to create separation and openness in the design
Course-textured, hedged or clipped native shrubs to frame lawn areas or pathways
Choose plants with interesting foliage colour or flowers as a highlight within the garden
Lot - Interface B Zone

LOT SIZE: 18m x 40m
FRONT SETBACK: 6m

All front lot garden designs must be prepared in accordance with the Octave at Junction Village Design Guidelines and are subject to approval by the Design Assessment Panel.

The following is an indicative garden design with some suggested potential options for paving, landscape features and planting design.

**Layered native shrub planting at front corner of lot**

**Groundcover**

**Small native tree, less than 15% of total space at maturity**

**Optional meandering entry path to front porch with stone steppers in gravel or crazy paving for articulation**

**Letterbox in keeping with architectural style + materials**

**Small native tree, less than 15% of total space at maturity**

**Concrete driveway with encouragement of linear accents such as feature paving bands or saw cuts**

**Small shrubs along driveway to screen boundary fences**

**Low groundcover planting directly in front of house to meet permit conditions of the Bushfire Management Overlay**

**Optional stone steppers in gravel or crazy paving for articulation**

**Access gate to side of dwelling, 1.5m width**

**Open Lawn**

**Maintenance Plan:**
- Remove fallen leaves and other debris
- Maintain grass height <5cm in Summer (reduce surface fire horizontal separation)
- Remove lower branches from trees min. 2m from ground (reduce fuel ladders - vertical separation)
LOT - INTERFACE B ZONE

PAVING & LANDSCAPE FEATURES/MATERIALS TO COMPLEMENT ARCHITECTURE

- Random stone steppers in gravel or grass with groundcovers
- Natural stone for paved pathways in an informal crazy pave style
- Consider adding a small birdbath (subject to approval) or flowering native plants to encourage birds to visit your garden
- Locate a garden seat in lawn or gravel to maximise use of the front yard

PLANTING DESIGN

Plant species must be selected from the lists provided in the Design Guidelines.

Octave at Junction Village is located within a Bushfire Management Overlay. Accordingly, a minimum of 60% of plants for all lots are required to be native and indigenous species selected from Plant List 1.

- Open lawn area framed by curvilinear gardens beds
- Use of natural rocks in key areas of the garden create a native bushland feel and add informal seating
- Unstructured soft edges to garden beds through the use of flowering plants
- Use of groundcovers and lawn alternatives to soften paving such as Dichondra repens or Thymus vulgaris

- A focus on contrasting colours and textures with the choice of plant species including fleshy-leaved plants such as succulents
- Choose flowering plants to add interest and colour to the garden
- Climbers such as Hardenbergia could be used along boundary fences for additional screening where space is restricted
- Maintain structured and defined edges to garden beds and lawn areas
APPENDIX C - FRONT YARD LANDSCAPE CONCEPTS (5/8)

14m STANDARD LOT

LOT SIZE: 14m x 32m
FRONT SETBACK: 4m

All front lot garden designs must be prepared in accordance with the Octave at Junction Village Design Guidelines and are subject to approval by the Design Assessment Panel.

The following is an indicative garden design with some suggested potential options for paving, landscape features and planting design.

Maintenance Plan:
- Remove fallen leaves and other debris
- Maintain grass height <5cm in Summer (reduce surface fire horizontal separation)
- Remove lower branches from trees min. 2m from ground (reduce fuel ladders - vertical separation)
14M STANDARD LOT

PAVING & LANDSCAPE FEATURES/MATERIALS TO COMPLEMENT ARCHITECTURE

- Contemporary brick paving (consider brick colour and pattern)
- Geometric pavers in gravel or grass. Use steel or timber edge to formalise garden beds and areas of gravel / lawn
- Potential to use extended garden beds, granitic gravel or lawn alternatives for ground treatment if lawn is not suitable
- Small water feature or sculpture to provide a focal point to the garden (subject to approval)

PLANTING DESIGN

Plant species must be selected from the lists provided in the Design Guidelines.

Octave at Junction Village is located within a Bushfire Management Overlay. Accordingly, a minimum of 60% of plants for all lots are required to be native and indigenous species selected from Plant List 1.

- A mixture of native and exotic plants create interesting plant combinations
- Highlight foliage structure and colour with the use of plants such as Senecio serpens and Phormium tenax
- Native feature tree with colourful flowers such as Illawarra Flame Tree
- Low hedging of small shrubs to give structure to the garden

- Linear planting lines through the garden adds movement
- Choose plants with interesting texture and foliage colour to add interesting
- Frame paths or driveway with small shrubs to add height and structure to the design
10.5m STANDARD LOT

LOT SIZE: 10.5m x 28m
FRONT SETBACK: 3m

All front lot garden designs must be prepared in accordance with the Octave at Junction Village Design Guidelines and are subject to approval by the Design Assessment Panel.

The following is an indicative garden design with some suggested potential options for paving, landscape features and planting design.
10.5M STANDARD LOT

PAVING & LANDSCAPE FEATURES/MATERIALS TO COMPLEMENT ARCHITECTURE

Random stone steppers in gravel or grass with groundcovers

Random stone steppers in gravel or grass with groundcovers

Stone paving provides texture to the garden

Potential to incorporate small sculptural elements to add detail within the garden (subject to approval)

PLANTING DESIGN

Plant species must be selected from the lists provided in the Design Guidelines.

Octave at Junction Village is located within a Bushfire Management Overlay. Accordingly, a minimum of 60% of plants for all lots are required to be native and indigenous species selected from Plant List 1.

Unstructured soft edges to garden beds by using flowering plants

Use fragrant and flowering groundcovers such as Trachelospermum jasminoides for interest

Feature small native flowering tree such as Eucalyptus ficifolia - Red Flowering Gum

Narrow hedged shrubs along driveway to soften boundary fence

Layer planting of different textures and heights to maximise the impact of the small garden

Colourful flowering plants such as Chrysocephalum or Lavandula add interest to the small garden size

Use climbers such as Trachelospermum jasminoides along boundary fences where space is restricted

Use succulent plants such as Senecio serpens for contrast

APPENDIX C - FRONT YARD LANDSCAPE CONCEPTS (8/8)
While this brochure reflects the proposed development at the time this brochure was created, the information it contains should be used as a general guide only. The representations of the development are artistic impressions only. In particular, the designs, plans, images, view lines, dimensions, layout, sizes and areas, facilities, amenities, infrastructure, number of lots, the configuration of these and other information contained in this brochure, the marketing display suite, internet site, videos, computer applications and all plans and schedules. Octave at Junction Village may change depending on a range of variable factors including, but not limited to, council building approvals and planning consents, market conditions, finance and government and municipal requirements. As a result, the Property Information is preliminary only and subject to change without notice as the development progresses. This brochure does not constitute part of an offer or contract. We recommend that you undertake your own enquiries, obtain independent legal advice and confirm the current Property Information at the time you enter into any purchase contract. Developer JD JVC Development Pty Ltd (ATF Junction Village Unit Trust) ACN 626 008 026 and its associated entities do not make any representations or give any warranties that the information set out in this brochure is or will remain accurate or complete at all times and disclaim all liability for harm, loss, costs or damage which arises in connection with any use or reliance on the information.
